

Instructions for Administration:

5 Years Old

This form is for children aged 5 years and 1 month through to 5 years 11 months and 29 days.

1.1 Gross Motor

1.1.1	Walks	Age: 5 - 9 Years
Materials	Toy/Object	
Instructions	Place a toy/object at a distance from the child and ask the child to get it.	
Response	Observe if the child is able to walk steadily without assistance.	
Scoring	Able Not Able	

1.1.2	Climbs stairs with alternate feet, not holding on	Age: 5-9 Years
Materials	Staircase	
Instructions	Stand the child at the lower end of a staircase. Ask the child to climb at least three or four stairs. If needed, prompt to walk with alternate feet.	
Response	The child should be able to climb stairs without support (e.g., handrail), with alternate feet.	
Scoring	Able Not Able	

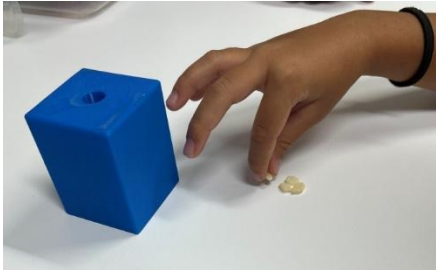

Gross Motor Severity Ratings

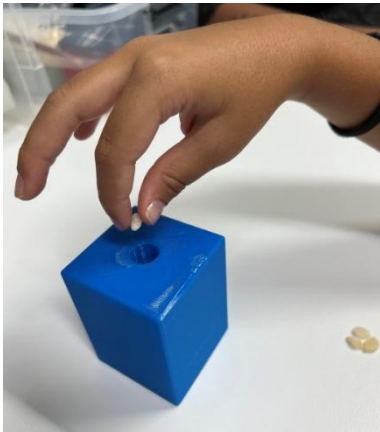

Typical	Mild	Moderate	Severe
Child walks steadily and climbs stairs without support, with alternate feet	Can walk but needs help in climbing steps or can walk and climb steps independently but unsteadily	Can walk with help	Unable to walk even with substantial help

1.2 Fine Motor

Note If the child does not perform the fine motor item for their age, but performs a more advanced fine motor item, then the item specific for their age is considered normal.

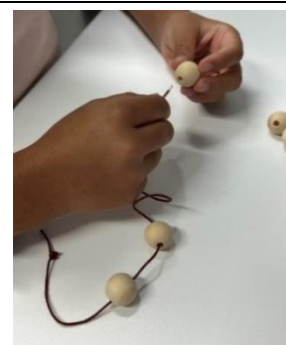

1.2.1	Holds small object with pincer grasp (Right Hand)	Age: 5 - 9 Years
Materials	Rice Bubbles	
Instructions	While sitting at a table with the child, place a small object, such as a rice bubble, on the table in front of the child and within their reach. Ask the child to grasp it with their right hand, using their index finger and thumb. Demonstrate as needed. 	
Response	Observe if the child grasps the object using distal pads of the thumb and index fingers (superior pincer grasp).	
Scoring	Able Not Able	

1.2.2	Holds small object with pincer grasp (Left Hand)	Age: 5 - 9 Years
Materials	Rice Bubbles	
Instructions	While sitting at a table with the child, place a small object, such as a rice bubble, on the table in front of the child and within their reach. Ask the child to grasp it with their left hand, using their index finger and thumb. Demonstrate as needed.	
Response	Observe if the child grasps the object using distal pads of the thumb and index fingers (superior pincer grasp).	
Scoring	Able Not Able	

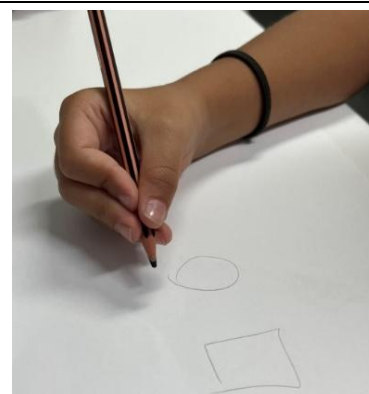

1.2.3	Places a small object (e.g., rice bubble) in the 1.25cm diameter opened container (Right Hand)	Age: 5 - 9 Years
Materials	Rice Bubble, Wooden Cube with 1.25cm diameter opening	
Instructions	While sitting at a table with the child, place a rice bubble and the container on the table. Demonstrate how to put the object into the container with thumb and index finger (superior pincer grasp). Ask the child to repeat what you did with their right hand (e.g., "Now you try"). Both grasping and releasing are observed. 	
Response	Observe if the child is able to successfully grasp and release the object into the container with their right hand.	
Scoring	Able Not Able	

1.2.4	Places a small object (e.g., rice bubble) in the 1.25cm diameter opened container (Left Hand)	Age: 5 - 9 Years
Materials	Rice Bubble, Wooden Cube with 1.25cm diameter opening	
Instructions	While sitting at a table with the child, place a rice bubble and the container on the table. Demonstrate how to put the object into the container with thumb and index finger (superior pincer grasp). Ask the child to repeat what you did with their left hand (e.g., "Now you try"). Both grasping and releasing are observed.	
Response	Observe if the child is able to successfully grasp and release the object into the container with their left hand.	
Scoring	Able Not Able	

1.2.5	Laces 4 beads	Age: 5 - 9 Years
Materials	4 beads, String	
Instructions	Demonstrate lacing beads to the child. Then, offer the child the string and beads, and ask the child to lace them.	
Response	The child should lace four beads without clumsiness.	
Grading	Able Not Able	

1.2.6	Draws a shape with a tripod grasp	Age: 5 - 9 Years
Materials	Paper, Pencil	
Instructions	Place a piece of paper on the table in front of the child. Demonstrate to the child how to hold the pencil using a tripod grasp and draw shapes (e.g., square, triangle, diamond) on the paper. Then, place the pencil on the paper with the writing end pointing away from the child and ask the child to draw a shape using the tripod grasp.	
Response	The child should be able to write using a tripod grasp with their preferred hand, without clumsiness. Note: For younger children in this age group (e.g., 5 years), it is developmentally typical for this skill to still be emerging so they may not yet demonstrate a consistent or fully mature tripod grasp. When scoring, ensure their performance is evaluated after you have demonstrated the expected tripod grasp.	
Scoring	Able Not Able	

1.2.7	Unbuttons and buttons shirt	Age: 5 - 9 Years
Materials	Small Button Up Shirt	
Instructions	Place a small shirt with button and buttonholes on the table. The lower end of the buttoned shirt should be towards the child. Ask the child to unbutton and button one button. Demonstrate if needed.	
Response	Observe if the child has completed the activity without clumsiness.	
Scoring	Able Not Able	

1.2.8	Throws ball one-handed 3 metres	Age: 5 - 9 Years
Materials	Plastic Ball	
Instructions	The examiner demonstrates to the child how to throw a ball overarm with one hand. The ball should be light and with a minimum size of a tennis ball. Then, give the ball to the child and ask them to throw it overarm. Repeat for the other hand.	
Response	Observe the child throwing the ball with one hand, overarm 3 metres without clumsiness. Test both hands separately, should pass both hands.	
Scoring	Able Not Able	

Fine Motor Severity Ratings

Typical	Mild	Moderate	Severe
Pincer grasp observed and small object released in container. Completes other tasks without clumsiness	Weak grasp, can use hands for most purposes	Difficulty in holding implements	No functional use of hands except to point

1.3 Vision

Note When smarties or 100s & 1000s are required for Vision items, select colours that contrast with the green cloth.

- Use: Yellow, Orange, Red
- Avoid: Green, Blue, Purple

1.3.1	Fixates on 100s & 1000s from 30cm distance	Age: 5 - 9 Years
Materials	1 100 & 1000, Green Cloth	
Instructions	The child is seated at the table, which is covered with the green cloth. Show the child the 100 & 1000 (<3 mm sized sweet). Ask the child to cover one eye. Say, "Ooh! Look at this thing". Then, sweep your hand across the table holding the 100 & 1000, and release it at some point during the sweep of your hand across the table. Observe whether the child fixates their gaze on the released object or not. Test each eye separately by lightly covering each eye (if the child peaks or has difficulty covering their eye, an assistant or guardian can help). If no response, test with a smartie; then with a 2.5cm block; then with the 6cm spinning red ball or woolly ball; then with a reflecting object or bright light as required.	
Response	Observe whether the child fixes their gaze on the 100 & 1000.	
Scoring	Able Not Able	

Vision Severity Ratings

Typical	Mild	Moderate	Severe
Fixates on 100 & 1000 from 30cm distance	Can see non-reflective object of 1.5 cm (e.g., Smartie)	Can only see non-reflective object of >1.5 cm (e.g., 2.5cm block)	Only perceives bright light or reflective object

1.4 Hearing

1.4.1	Points at pictures when asked at 45cm behind the ear with minimum voice.	Age: 5 - 9 Years
Materials	Set of 6 Hearing Cards	
Instructions	Place the Hearing Picture Cards on the table in front of the child in two rows (three cards per row) in any order. Familiarise the child to each picture. Ensure that the child is able to recognise the pictures (e.g., by pointing) on verbal command: cow, horse, ball, tiger, elephant, duck. Now, move to a position at the side of the child so that you are out of eyesight and your mouth is 45cm away from their ear. Then, using a minimum voice, but not a whisper, say three of the six Hearing Cards one at a time. Then, move to the other side and say three pictures. Say the pictures at random on each side to ensure the child has no difficulty in hearing. If the child does not respond to the minimum voice, test in an increasingly louder voice as required until they respond. Begin with a normal speaking voice, then use a loud voice, and finally, if necessary, shouted speech. 	
Response	The child recognises and/or points to at least one picture when asked with a minimum voice.	
Scoring	Able Not Able	

Hearing Severity Ratings

Typical	Mild	Moderate	Severe
No difficulties with hearing normal speech.	Difficulty with normal speech. Can hear loud voice. (Lowest dB heard 25-40 dB)	Difficulty with loud speech. Can hear shouted voice. (Lowest dB heard 40-60 dB)	Difficulty with shouted speech. Can hear amplified speech. (Lowest dB heard 60-90 dB)

1.5 Expressive Language

Note This domain relies primarily on observation of child vocalisations during the session:

- The examiner must be vigilant about recording child vocalisations and examples of phrases spoken throughout the assessment.
- Interact and speak with the child to encourage vocalisations. You may wish to use real objects or pictures in story books and ask the child to name and describe the pictures.
- Consider clarity of speech as well and document on the record form.
- If no vocalisations are made throughout the assessment, ask the caregiver if this is typical as it is not uncommon for children to behave differently in new and unfamiliar situations. Document specific examples of vocalisations reported by the caregiver on the record form.

1.5.1	Able to say a meaningful sentence of 4-6 words	Age: 5 - 9 Years
Materials	None	
Instructions	The child should be able to put at least four meaningful words together to express a thought. For example, "Ronny is wearing a red shirt".	
Response	Note if the child is able to put at least four words together meaningfully to express a thought throughout the assessment.	
Scoring	Able Not Able	

1.5.2	Takes part in conversation	Age: 5 - 9 Years
Materials	None	
Instructions	Throughout the assessment, ask the child a few simple open-ended questions and observe if they answer you accordingly. For example, general rapport building questions related to their daily life, such as: - What do you usually do after school? - What is your favourite game? - Can you tell me something about one of your friends? - Do you have any pets? What kind?	
Response	The child should take part in the conversation with appropriate answers .	
Scoring	Able Not Able	

Expressive Language Severity Ratings

Typical	Mild	Moderate	Severe
Child is easily understood and able to put at least four words together meaningfully to express thoughts and ideas.	Speaks and is understood but can get across only basic ideas.	Understood with difficulty, gets only basic needs across.	Either no speech or cannot be understood by others.

1.6 Cognition

1.6.1	Matches shapes on puzzle board (circle, square, triangle)	Age: 5 - 9 Years
Materials	Shapes Puzzle Board	
Instructions	Sit the child at a table. Place the pieces correctly in the board, holding it in your lap or under the table so that the child does not see you insert them. Place the Puzzle Board on the table, directly in front of the child. Remove each shape while the child is watching and say, "I am taking them out". Place the pieces between the board and the child in the following order, beginning at their left and moving to their right: square, circle, triangle. Gesture towards the board, say invitingly, "Put them in". Do not point directly to the holes. If no response, repeat this procedure three times and score the response after the last demonstration.	
Response	The child is able to match the shapes and put all three shapes in their appropriate places in the board.	
Scoring	Able Not Able	

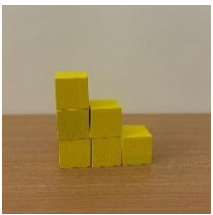

1.6.2	Matches 4 colours	Age: 5 - 9 Years
Materials	Blocks (four different colours)	
Instructions	Take four blocks, each a different colour, and place them in a well-spaced horizontal line on the table in front of the child. Name each colour as you do so.  Say "Now I am going to find one that is just the same" . Select a block from the pool and place it beside its match. Say, "Now you find me one that is just the same". This is repeated with all four colours. If no response, repeat the procedure three times and consider the response after last demonstration.	
Response	The child is able to match four different colours.	
Scoring	Able Not Able	

1.6.3	Understands at least 2 of big/small, more/less, right/left	Age: 5 - 9 Years
Instructions	Administer items a, b and c following the instructions below.	
Final Scoring	Able – if the child provides correct response on at least 2 of 3 items Not Able – if the child provides correct response on 1 or 0 items	
1.6.3a	Understands big/small	Age: 5 - 9 Years
Materials	Big Spoon, Small Spoon	
Instructions	Place two different sized spoons on the table with a space between them keeping the handles towards the child.  Then, ask the child: "Which spoon is big? Which spoon is small?"	

Response	The child is able to show correct size identification either by pointing with finger or with eyes; or by touching.	
Scoring	Able Not Able	
1.6.3b	Understands more/less	Age: 5 - 9 Years
Materials	Blocks of the same colour	
Instructions	Place two pools of the same colour, but different numbers, of blocks on the table horizontally with a space between them. Then ask the child, "Which is more? Which is less?".	
		
Response	The child is able to show which pool of blocks is more, and which is less by either pointing with finger or with eyes; or by touching.	
Scoring	Able Not Able	
1.6.3c	Understands right/left	Age: 5 - 9 Years
Materials	None	
Instructions	Ask the child, "Which is your right hand? Which is your left hand?"	
		
Response	The child is able to show their correct hand when asked.	
Scoring	Able Not Able	

1.6.4	Draws a person as best they can (head, body, arms, legs)	Age: 5 - 9 Years
Materials	Paper, Pencil	
Instructions	Place a piece of paper and a pencil with the writing end pointing away from the child on the table. Ask the child to draw a person as best they can.	
Response	The child is able to draw at least a head, body, arms and legs. If the child draws arms from the head, consider it as able. A 'stick person' is also considered able. If the drawing is missing any key features (head, body, arms, or legs), you may prompt the child by saying, "Check if there's anything you might have missed." You may prompt up to 3 times and the child still be scored able.	
Scoring	Able Not Able	

1.6.5	Builds three steps	Age: 5 Years
Materials	6 Blocks of the same colour	
Instructions	Demonstrate to the child how to build three steps out of six blocks and say, "See the steps". Then, break the steps and give your blocks to the child and ask the child to build steps like yours. If incorrect response, repeat three times and consider the response after last demonstration.	
Response	The child should be able to build three steps with six blocks.	 
Scoring	Able Not Able	

1.6.6	Draws a square	Age: 5 Years
Materials	Paper, Pencil	
Instructions	Place a piece of paper on the table in front of the child. Draw a square on the paper. Then place the pencil on the paper, with the writing end pointing away from the child and ask the child to draw a square. If incorrect response, repeat three times and consider the response after last demonstration.	
Response	The child should be able to draw a square.	
Scoring	Able Not Able	

Cognition Severity Ratings

Typical	Mild	Moderate	Severe
Completes tasks appropriate to their age.	“ Slow ” in cognition & no accompanying expressive language deficit	“Poor” in cognition & no accompanying expressive language deficit OR “Slow” in cognition & difficulty in expressive language.	“ Poor ” in cognition & difficulty in expressive language

“**Slow**” = when the child is unable to perform 1-3 items

“**Poor**” = when the child is unable to perform >3 items

1.7 Behaviour

Note It is essential the examiner scores the Behaviour items based on both their observations and caregiver report. Observe and record the child's behaviour according to the activities listed under this domain.

Gather adequate information regarding the frequency, intensity, duration, onset, and setting of the child's behaviours to help determine the overall severity rating.

1.7.1	Poor peer play	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Difficulty in making friends - Likes to play alone - Does not play imaginative games with another child - Does not play games that needs some joining in with a group of other children (e.g., ball games)	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.2	Acts very aggressively towards other people	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Hits others when disagreeing with them	

	- Bullies others
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.
Scoring	Yes (atypical behaviour) No (typical behaviour)

1.7.3	Acts extremely withdrawn and shy	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Cannot interact with others - Interferes with socialisation	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.4	Shows odd or unusual behaviours	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - More interest towards particular objects or parts of a toy (e.g., spinning the wheels of a toy car) - Motor mannerisms (e.g., flapping of hands) - Unusual movement of whole body (e.g., spinning, jumping, rocking) - Any special interest, unusual in their intensity, but otherwise appropriate for peers (e.g., trains, dinosaurs, etc.) - Unusually strong interest in particular sights, smells, touch, textures etc	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.5	Temper tantrums	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Often loses temper - Shouting and crying	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.6	Hyperactivity	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Often fidgets, runs, and climbs, in situations where it is inappropriate (e.g., in the classroom) - Unable to be still for expected times - Has difficulty waiting in turn taking games - Intrudes on others (e.g., butts into conversation) - Talks excessively	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.7	Inattentive	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Fails to give close attention to details (e.g., overlooks or misses details, work is inaccurate, makes careless mistakes in schoolwork) - Has difficulty sustaining attention where needed (e.g., tasks, play, lengthy reading, focusing attention during lectures, etc) - Often does not seem to listen when spoken to directly (e.g., mind seems elsewhere) - Often does not follow through on instruction and fails to finish school work etc.	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

1.7.8	Extreme fear	Age: 5 - 9 Years
Materials	None	
Instructions	Observe and ask the caregiver about the following behaviours of the child. For example: - Becomes fretful in an unfamiliar environment - Easily scared - Loses courage	
Response	Consider if the child has typical behaviour and consider if any of the above behaviours impact social (family, peer group) or occupational (usually schooling) functioning.	
Scoring	Yes (atypical behaviour) No (typical behaviour)	

Behaviour Severity Ratings

Typical	Mild	Moderate	Severe
Consider typical if any of the above behaviour has no untoward impact on the social (family, peer group) or occupational (usually school) functioning	No more than minor limitation in present social (family, peer group) or occupational (usually school) functioning	Symptoms or functional limitations between 'mild' and 'severe' are present. Especially if there are repeated complaints from school or social/peer groups	Symptoms result in marked limitation in social (family, peer group) or occupational (usually school) functioning; difficulty in management by family

1.8 Self-Care Items

Note The child should be scored based on whether the skill is present/absent and their ability to perform the skill when required. If the child lacks the ability to perform the skill, score the item as not able. If the child has the ability to perform the skill but does not do so when needed or without help, score the item as not able. Take into consideration how often the child performs the skill or behaviour when needed, without assistance and without prompting.

1.8.1	Feeds Self	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child can feed self.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

1.8.2	Drinks by themselves with cup/glass	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child can drink by themselves from a cup/glass.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

1.8.3	Puts on and takes off shoes independently	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child can put on and take off shoes independently.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

1.8.4	Bladder toilet trained independently	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child is bladder toilet trained independently.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

1.8.5	Washes and dries hands and face	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child washes and dries hands and face.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

1.8.6	Brushes teeth	Age: 5 - 9 Years
Materials	None	
Instructions	Ask caregiver if the child brushes teeth.	
Response	Caregiver's recall. The child should perform the activity independently.	
Scoring	Able Sometimes with help / Not able	

Self-Care Severity Ratings

Typical	Mild <25%	Moderate 25-50%	Severe > 50%
Child has the ability to perform all of the above tasks and will perform them most or all of the time without prompting/reminders and without assistance.	Scored Sometimes with Help/Not Able for 1 of 6 activities.	Scored Sometimes with Help/Not Able for 2 - 3 of 6 activities.	Scored Sometimes with Help/Not Able for >3 of 6 activities

1.9 Seizure

1.9.1	Seizure (unprovoked)	Age: 5 - 9 Years
Materials	None	
Instructions	Ask the caregiver or check records as to whether child has ever experienced an unprovoked seizure. Seizures are manifestations of neuronal injury due to excessive electrical activity in the brain. Any disturbance in the brain may cause seizures, which may be single or repetitive, and involves a sudden change in behaviour.	
Response	Score no and consider typical if the child has not experienced any episode of seizure in the past year.	
Scoring	Yes No	

Seizure Severity Ratings

Typical	Mild	Moderate	Severe
The child has not experienced any episode of seizure in the past year.	One or more than one unprovoked seizure in the past year but not in the past month.	One or more than one unprovoked seizure in the past month.	More than one unprovoked seizure in the past week.
