

BASC-3 Procedure Manual

(Part 2: Scoring and Uploading BASC Results)

This section supports bringing BASC-3 results into the child's Tracking Cube story. A psychologist, or a trusted person trained by a psychologist, may complete the administrative steps (accessing Pearson, downloading, and uploading reports). A psychologist is responsible for interpreting the results.

Step 7: Generating a Report.

- If the assessment has been administered in person, the option to generate a report will be apparent after completing the assessment.
- If you administered the assessment via email link the following steps must be followed:
 - i) Enter into your examinees record by selecting their name on the Q-Global home page (see below)

Examinee
Proctoring Schedule
Group Administration
Report

☐ Include Sub-Accounts

		System ID	Last Name	First Name	Examinee ID	Birth Date	Gender
1	☐	30403242	Smith	Bob	MLU_1	12/11/2014	Male

- ii) In the examinees record, select the assessment that was submitted and then select the icon labelled "Generate Report" (see below).
- iii) From here, you will be directed to select a BASC-3 report from your inventory. Here you must choose the "select" icon for "BASC-3 Report with Intervention Recommendations" (see below).

Report Selection & Configurations

BASC-3 Report with Intervention Recommendations

Inventory Needed: 1
8 usages available

Select

- iv) Once selected you will be prompted to provide further information. Select the following information shown in the screenshot below:

Report File Type

- ☒ Adobe PDF
☐ Word DOCX

Report Options

Include

- ☒ Examinee name

Clinical and Adaptive Scales

- ☒ Validity Index summary table
☒ T Score profile (Composites and Scales)
☒ Score tables (Composites and Scales)
☒ Validity Index item lists
☒ Narratives (Composites and Scales)

Intervention Recommendations

- ☒ Intervention recommendations

Content Scales and Indexes

- ☒ T Score profile
☒ Score tables
☒ Narratives

Advanced Clinical Interpretation

- ☒ Clinical Validity Index narratives
☒ Clinical Index narratives
☒ DSM-5 diagnostic criteria

- ☒ DSM-5 diagnostic considerations
☒ Emotional Disturbance Qualification scale (EDQs)
☒ Target behaviors for intervention
☒ Critical items

Items by Scale/Index

- ☒ Clinical and Adaptive Scales
☒ Content Scales and Indexes

- ☒ Item responses

Settings

Confidence level

- ☐ 68%
☐ 90%
☒ 95%

Primary norm group

- ☐ General combined
☒ General gender-specific
☐ Clinical combined
☐ Clinical gender-specific
☐ ADHD combined
☐ ADHD gender-specific

Select up to four additional Norm Groups for comparison

- ☐ General combined
☒ General gender-specific
☐ Clinical combined
☐ Clinical gender-specific
☐ ADHD combined
☐ ADHD gender-specific

- v) Once all boxes are selected, select the yellow “Generate Report” icon on the right side of the page (see below). A PDF document will then begin to download.

- Please insert all information and proceed to upload the available CSV file by clicking on *green* “Upload file” link.
- This step will direct you to select the downloaded CSV file from your computer. Simply click on “choose file” on the pop-up window and select the file from your computer.

Note. The file will automatically download into the “Downloads” folder on your computer and can be found there.

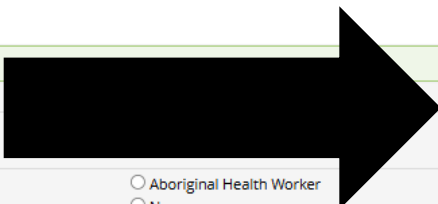

- Once the CSV file is selected from your computer, you will be directed back to the pop-up window where you must select the blue “Upload File” icon to begin uploading the file into RedCap (see below).

- Once the CSV file has been successfully uploaded, your interface should look similar to the example below.

e.g.,

- The next step is to change the status of the “BASC-3 Parent Score import request” to “Import Completed” by selecting this option (see below)

- IMPORTANT:** You must then SAVE this form by selecting the blue “Save & Exit” or “Save & Stay” icons in the top right-hand corner of the form (see below).

Adding new Record ID 1.
